PROFILE

I'm a passionate **MERN Stack Developer** with over **3 years of hands-on experience** in building modern, scalable, and fully responsive web applications. I have successfully developed and deployed **10+ real-time projects**, demonstrating expertise in both front-end and back-end development.

My portfolio includes advanced projects such as a **Job-Portal**, **Object-Detector**, **WhatsApp Clone**, **Blog Application**, **Flipkart Clone**, and **Google Docs Clone**, among others — all designed with real-time functionality, optimized performance, and seamless user experience.

I specialize in using **MongoDB**, **Express.js**, **React.js**, **Next.js** and **Node.js** to create high-quality web solutions that meet client needs and industry standards. My focus is on clean code, responsive UI, and efficient APIs to deliver professional-grade applications.

EMPLOYMENT HISTORY

❖ MERN Stack Developer, Tech

With **3 years** of experience as a **Full Stack Developer**, I worked on projects at **Coding First**, focusing on seamless integration and staying abreast of emerging technologies. In my previous role at **Coding First**, I contributed to mission-critical applications, reduced project development times, and mentored junior developers. Certified as a **Full Stack Developer** by **Coding First**, I bring a passion for innovation and a commitment to excellence in every project.

❖ Front-End & Back-End Developer

- Expert in **Full Stack web development**, specializing in Front-End technologies with React.js, Next.js and Back-End development using Node.js and Express.js.
- Proven record in designing visually appealing, **user-friendly websites**.
- Implementation of **e-commerce** solutions.
- Effective client collaboration to translate visions into **functional websites**.

EDUCATION

❖ The Islamia University Bahawalpur

BS (Software Engineering)

I believe that a **solid educational foundation** plays a crucial role in my professional **development** and ability to provide exceptional services to **my clients**.

❖ CodingFirst

MERN Stack Development

I pursued MERN Stack Development at “Coding First” Bahawalpur, where I gained hands-on experience and expanded my skills in modern web development. Over the past 3+ years as a Full Stack Developer, I have continuously worked on various projects, further strengthening my expertise in Full Stack Development.

Skills

- ❖ Full-Stack Web Development (MERN Stack: MongoDB, Express.js, React.js/Next.js, Node.js).
- ❖ Front-End Development with React.js/Next.js, Material UI, Daizy UI, Shadcn UI, Tailwind CSS.
- ❖ Back-End Development using Node.js and Express.js.
- ❖ RESTful API Development and Integration.
- ❖ Real-Time Communication with Socket.io.
- ❖ Authentication using JWT, Google OAuth, Clerk .
- ❖ Database Management with MongoDB and Mongoose.
- ❖ Responsive Web Design and UI/UX Implementation.
- ❖ Routing and Navigation using React Router DOM.
- ❖ Version Control with Git and GitHub.
- ❖ Deployment on Render and Vercel.
- ❖ Strong Debugging, Problem-Solving, and Clean Code Practices.

WORK EXPERIENCE

Here are some of the major projects I've developed, showcasing my skills in full-stack development and modern web technologies:

❖ **WhatsApp Clone Website**

WhatsApp Clone is a fully responsive, real-time chat application built with the **MERN Stack** and **Material UI**, featuring **secure Google Authentication** and **instant messaging** via **Socket.io**. It efficiently manages **chat sessions**, **message synchronization**, and **user data**, ensuring **high performance** and a **smooth experience across devices**. This project demonstrates expertise in **full-stack development**, **real-time web technologies**, **authentication**, and **responsive UI design**.

❖ **Blog Application Website**.....

Blog Application is a fully responsive, dynamic web platform built with the **MERN Stack** and **Material UI**, enabling users to **sign up**, **log in**, and **manage blogs** with full CRUD functionality. Users can **comment on posts** and utilize a **category-based search** for quick access to relevant content, ensuring interactive and organized user engagement. This project demonstrates expertise in **front-end design**, **backend API integration**, **authentication**, and **full-stack development** within the **MERN** ecosystem.

❖ Flipkart Clone Website.....

Flipkart Clone is a fully responsive e-commerce web application built with the **MERN Stack** and **Material UI**, replicating core online shopping features for a seamless user experience. It includes **secure authentication, dynamic product listings, detailed product pages, and a fully functional shopping cart**, enabling easy management of purchases. This project demonstrates expertise in **front-end design, backend integration, authentication, and full-stack e-commerce development** within the MERN ecosystem.

❖ Portfolio Website.....

Portfolio Website is a fully responsive personal web application built with **React.js** and **Material UI**, designed to showcase professional projects and achievements with a modern, elegant interface. It features **React Router DOM** for smooth navigation across sections like Home, About, Projects, and Resume, highlighting skills, experience, and MERN stack projects. This project demonstrates expertise in **front-end development, component-based design, routing, and responsive UI/UX styling** using Material UI.

❖ Google Docs Clone Website.....

Google Docs Clone is a fully responsive, real-time collaborative document editor built with the **MERN Stack, Material UI**, and **Quill.js**, enabling multiple users to edit documents simultaneously with a sleek interface. Real-time synchronization is powered by **Socket.io**, while **MongoDB** efficiently manages document storage, retrieval, and updates for consistent performance. This project demonstrates expertise in **real-time web technologies, collaborative editing, rich text integration, and full-stack MERN development**.

❖ Job Portal.....

Job Portal is a fully responsive full-stack web application built with **React (Vite), Tailwind CSS, Shaden UI, Supabase, and Clerk**, providing a seamless experience for job seekers and companies. It features **user authentication, real-time database operations, dynamic job listings, company & job management, and advanced filtering** for efficient job search and posting. This project demonstrates expertise in **full-stack development, authentication integration, database management, and modern responsive UI design** using contemporary React technologies.

❖ Object Detector.....

Object Detector is a real-time AI-powered web application built with **Next.js, React, Tailwind CSS, and TensorFlow.js (COCO-SSD)**, detecting and classifying objects instantly through the user's webcam. The application runs **100% client-side**, delivering smooth AI performance without a backend, with a **modern, responsive interface** optimized for fast rendering and minimal dependencies. This project demonstrates expertise in **real-time video processing, browser-based AI integration, frontend optimization, and responsive web development**.
